

MAINTENANCE PROCEDURES FOR LITTLE TOT BUMPER BOATS

PERTAINING TO THE PUMP

Daily inspection of the pump's condition and routine inspection of the electrical connections is advisable.

Note: Make sure that the inlet area of the pump is not restricted or clogged.

BATTERY INSPECTION

Routine inspection of the battery and the condition of the charge should be considered essential for a successful operation. A fully charged battery is important to assure that there is reserve power to get through the "peak" periods.

FIBERGLASS BOAT

Visual inspection that all fasteners and guards are in place. Never operate the boats without the battery cover and seat in their proper position.

It is important to do a visual inspection of the fiberglass checking for cracks or rough surfaces that might cause harm to riders.
